

SCHOOL OF COMPUTER SCIENCE AND ARTIFICIAL INTELLIGENCE

Department of Computer Science Engineering

Course Code: 23CS002PC304

Course Title: AI Assisted Coding

Year/Sem: III / II

Assignment Number: 21.1 / 24

Name: O.Narasimha Raju

HT No: 2303A53034

Batch: 46

Lab Objectives

- Use AI as a pair programmer
- Integrate code with Git version control
- Practice collaborative workflows
- Improve debugging and feature development

Task 1: To-Do List Program

```
tasks = []

def add_task(task):
    tasks.append(task)

def show_tasks():
    for t in tasks:
        print(t)
```

Task 2: Git Workflow

```
git init
git checkout -b feature
git add .
git commit -m "Added feature"
git checkout main
git merge feature
```

Task 3: Commit Messages

```
"Added login validation"
"Fixed bug in task manager"
```

Task 4: Pair Programming

- One developer writes base code
- Second improves using AI
- Merge using Git

Task 5: Debugging

```
def add(a, b):
    return a + b

print(add(2, "3")) # Error
```

Task 6: Feature Expansion

```
history = []

def calculate(a, b):
    result = a + b
    history.append(result)
    return result
```

Conclusion

AI enhances collaboration, version control, and development efficiency.
